BASIC-ABSTRACT:

NOVELTY - The frame consists of upper and lower elements (1,2) and two interconnected side elements (3). A rail element (4) is provided parallel to and a distance from the lower element and is held in place by spacers (5). A support element (6) is located between the rail and the lower element on which is positioned a plant container. Rods or nails are provided on the side and top elements which provide support for climbing plants.

USE - For displaying e.g. pictures.

ADVANTAGE - The frame enables plants to grow about it.

DESCRIPTION OF DRAWING(S) - The drawing shows a front view of the frame.
